The highly reliable, PC-based E-max Express offers simplicity and sophistication with its ease of use, ergonomic operator comfort, advanced programming capabilities, & multi-level security features.

The technologically advanced E-max Express is versatile & simple to operate, with all the features you'd expect from the industry leader.

Features & Benefits

› Single hall video output and built-in color camera

› Multiface pattern verification; specifically designed to verify UniMax® and Capitol® bingo paper

› Magnetic card reader provides various security levels and quick logon

› Optional accessories include a random number generator and protective Naugahyde cover

Operation & Design

› Integrated design with adjustable 17" USB touchscreen monitor

› Intuitive operation, offering touchscreen, keyboard, or mouse interactivity

› Quiet double acrylic ball chamber features fluorescent red & green panels that "glow"

› Reflective back of ball chamber gives players a 360° view of the balls

Performance & Reliability

› Flashboard outputs are thermally protected from static electricity & perform with most flashboards

› Sealed ball switches protect against drink spills and airborne contaminants

› Integrated UPS[1] protects against power surges and prevents crashes

› Manual backup mode in the event of PC failure
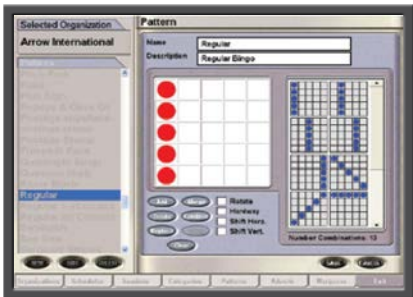

[1]Uninterrupted power supply

The system's user-friendly software features quick reference pop-up screens and expanded programming options with vivid and detailed color graphics and easy-to-follow menus.
